OVERALL GOAL STATEMENT
The 13th Annual Cardiovascular Symposium will focus on the high-priority issues and latest clinical advances in the ever-changing field of cardiovascular medicine. Come, if you dare….

AGENDA
7:15 AM Registration and Continental Breakfast
7:50 AM WELL HELLO, CLARICE…
Welcome and Program Overview
John “Svenghouli” Gossett, RN
8:00 AM THE UNINVITED
Management of Acute Coronary Syndrome with STEMI
Ravi Vallabhan, MD, FACC
9:00 AM WHAT LIES BENEATH
Endovascular AAA Repair in High-Risk Patients
Stephen Hohmann, MD
10:00 AM Break
10:30 AM JEEPERS CREEPERS!
High-Risk Percutaneous Coronary Intervention (PCI): Left Main and 3 Vessel Intervention
Robert Stoler, MD, FACC, FSCAI
11:30 AM I DO WISH WE COULD CHAT LONGER, BUT… I’M HAVING AN OLD FRIEND FOR DINNER - Lunch/Exhibits
1:00 PM THE INVISIBLE MAN
Cardiovascular CT: Current Imaging Strategies for Noninvasive Cardiac Evaluation
Jeffrey M. Schussler, MD, FACC, FSCAI
2:00 PM Break and Exhibits
2:20 PM SILENCE OF THE LIMBS
Lower Extremity Revascularization: Innovative Techniques and New Modality of Therapy
Javier Vasquez, MD
3:20 PM ATTACK OF THE REHAB MONSTERS
Cardiac Rehab: Specificity of Training for the Industrial Athlete in a Cardiac Rehabilitation Setting
Jenny Adams, PhD and Danielle Strauss, BSN, RN-BC, BS
4:20 PM Questions and Answers, Closing Remarks, and Evaluation

LEARNING OBJECTIVES
- Appraise the issues regarding anatomical suitability, techniques, periprocedural care, and service provision of AAA repair in high-risk patients.
- Discuss the impact that AHA/ACC, ACCP, and other national guidelines, along with new trials, are likely to have on the future management of patients with STEMI & ACS.
- Identify appropriate patients as potential candidates for Left Main Percutaneous Coronary Intervention (PCI), with a comprehensive update of new supportive devices.
- Compare and contrast noninvasive cardiac computed tomography with other imaging modalities (Echo/Cath/Nuclear).
- Examine the cardiac rehabilitation guidelines & implications involved with the industrial athlete/patient returning to work, with a focus on police and firefighter patients.
- Delineate innovative techniques and new modality of therapy for lower extremity revascularization.

TARGET AUDIENCE
This annual premier event focuses on the specific needs of:
- Cardiac Catheterization Lab Directors
- Cardiac Electrophysiology Specialists
- Cardiac and Pulmonary Rehabilitation Specialists
- Cardiac Sonographers
- Cardiovascular Allied Health Professionals
- Cardiovascular Invasive Specialists
- Cardiovascular Technologists
- Case Managers
- Certified Cardiographic Technicians
- Diagnostic Cardiac Sonographers
- Emergency Medical Technicians
- Nuclear Medicine Technicians
- Nurses
- Nurse Practitioners
- Radiologic Technologists
- Respiratory Therapists
- Vascular Specialists
